

First 10 Digital - PHP Web Developer

A little about - First 10

We are a growing Digital Marketing & Web Design / Development agency based in central Leeds, West Yorkshire. We love what we do. New opportunities excite us, meeting new people and re-connecting with old friends on new projects. We love to share: our knowledge, our experience and our ideas.

We've got a little manifesto that keeps us on the straight and narrow. And once we get to know you a little better, we might just show it to you. But for now, you'll have to make do with our First 5 Rules:

- We only work with people we trust and brands we admire. Because, in all honesty, life's too short to not to
- We only work on projects that have a measurable impact, and that we honestly believe will make a difference – otherwise how can we feel good about what we do
- We maintain a small core team that we can scale up with trusted and experienced partners when the need arises. We'll let you know when this happens, and you can talk to any of the team to make sure we understand where you're coming from
- We give back by offering free time and resources to organizations or start-ups that are doing great stuff to make positive change. We all need a leg-up from time to time and what goes around comes around
- We don't spend our time chasing pitches and fantasising about that next big client. We prefer being pro-active to help our current clients grow. After all, if we can help you be more successful, we'd like to think you'd give us more work!

If the above sounds like a business you would like to be part of then continue reading to find out about an amazing opportunity for a web developer!

Position Overview

Job Title	Web Developer
Working hours	9 - 5.30pm (inc. 1 hour for lunch)
Salary	£23-28k p.a depending on experience
Location	Leeds, UK
Reporting to	Technical Director
Type	Full time / Permanent

We are looking for a versatile, hands-on back end developer to work on our websites. Experience is important, but what we really value are talent, motivation, versatility and character. You must be able to work well independently and within a small team. You must be a fast and willing learner, fearless in asking the right questions, and resourceful in finding the right answers. We are a small, close-knit team – you must be excited about working in an environment with other smart and motivated people.

This is a varied and challenging role focusing on development and support of First 10's business core applications and websites.
